

Evolution Jetsports LLC Jet Ski Damage Fee Schedule

Read this fee schedule completely. By acknowledging and signing this form, you agree to return the equipment in the condition received and that if the equipment is returned damaged, you are fully responsible to pay the costs as represented by the fee schedule below. If the type of damage is not listed, it will be quoted at the current market value.

Renters have the option to purchase collision coverage at the time of booking. The cost of this optional insurance will vary based on the amount of equipment, which equipment is rented, and the duration of the booking. This insurance covers damage to the personal watercraft (PWC) with a \$1,000 deductible per PWC, for which the renter is responsible. (Each PWC has its own \$1,000 deductible, and renters are responsible for all damage up to this amount.) This coverage does not include recovery or towing in the event of sinking or grounding, nor does it cover lost items such as life jackets or keys. Please refer to the Evolution Insure document for full details of the insurance policy.

I, the Renter, agree that I am responsible for all damage that occurs to the jet ski and that I agree to pay the prices on the fee schedule to return the jet skis to their pre-launch condition if damage occurs. I, the Renter, also agree that if any damage occurs that is not listed on the fee schedule, it will be priced at the current market rate with labor quoted by a local professional. I, the Renter, consent to allow my card on file to be charged for any damages, with a bill and breakdown of charges provided after the fact.

Time PWC Is Unusable or Being Repaired - \$250 per day

Fiberglass damage - \$100 per square inch

Running Aground or PWC Needing To Be Towed - \$350

Underwater Recover – Depends On Cost At The Time
